#### Allergens

Due to the nature of zero waste shopping, it is inevitable that nearly all allergens are present on the premises. This may be in the product itself or traces due to the manufacturing process. We do everything that we can to keep allergens separate within the shop and in the storage area, however there is still a chance of traces as it is an open environment.

Where notified by our suppliers that allergens are present or there are traces in products, we will state them on our dispensers and on labels. If you have a minor allergy, please inform a staff member. If you suffer from life threatening allergies, we do not recommend shopping here. Should you need any further advice please contact us via phone or email if possible.

#### Hygiene and Food Safety

Our product dispensers and scoop jars are all filled in our shop and in an hygienic environment and all utensils and containers are washed and sanitised before use.

If you bring your own containers to fill, please ensure they are cleaned thoroughly, and fit for purpose, as we cannot take responsibility after the product has left our dispensers. Containers must be completely dry before refilling as water promotes the growth of bacteria and can also reduce the shelf-life of products.

Unfortunately, products that enter a customer's container cannot be put back into our dispensers due to the risk of cross-contamination, therefore as a small business we kindly request that you purchase anything that you dispense.
